

Softbox

The NEXT range of versatile and expansive softboxes, promising to achieve optimal lighting in various photographic applications catering to both product and portrait photography. Equipped with dual diffusion planes, ensuring an even spread of light. Additionally, one of the diffusers can be effortlessly removed to suit specific lighting needs. The unique proprietary structured reflective fabric, facilitates an even distribution of light across the diffuser planes. The additional front flange section is designed for mounting a honeycomb grid. The mounting ring's structure allows seamless 360-degree rotation of the softbox, ensuring hassle-free adjustments. Assembly & disassembly are made easy for quick setup. Compatible with most major brands in the photographic, Videographic and Cinematographic Industries.
